NO ROAD TOO STEEP... NO SNOW TOO DEEP.

Volume 13 Issue 8 • Aug. 2021

*Established in 1942 by Emmitt Tucker Sr., **Tucker Sno-Cat®** is known worldwide for their four-tracked design, excellent performance, and efficiency. The original manufacturer of over-snow transportation, Tucker Sno-Cat® vehicles provide the ultimate traction advantage in steep terrain, while leaving a gentle footprint.*

Focus on Features: **CAB HEATERS**

All Tucker Sno-Cat® models are produced with a single Red Dot cab heater. This heater is capable of heating in the majority of our customers environments and is rated at 29,000 BTU (British Thermal Unit). Although this is impressive, we have customers that live and work in “Extreme” cold climates. These extreme locations call for dual heaters for our extended cab models.

Here at Tucker Sno-Cat®, we have designed an under seat additional rear heater option to accommodate these severe conditions.

FACES AROUND THE FACTORY

Our company's success is a direct result of our employees' efforts, grit and grace. An organization is only as good as its employees, and we are fortunate to have a great team.

Generations

Carrying on a family tradition, Steven Tucker and his son, Brandon, are fourth and fifth generation Tuckers working together here at the factory . Steven started his career at Tucker Sno-Cat® when he was 16 years old, and is currently our Vice President and Purchasing Manager.

Brandon just completed his sophomore year at a local college, is working towards earning an Associates Degree while looking forward to joining the US Air Force in the near future.

Thank you Steven and Brandon for your hard work and dedication.

Service Department Notes: ***CLEANING LEXAN DOORS & WINDOWS***

KEEPING YOUR LEXAN DOOR WINDOW CLEAR

SERVICE

Clyde's tips for giving your Lexan windows more life:

1. Wash all windows after you return to the shop or off the road.
2. Wipe windows down often with a plastic cleaner or polish. We use Plexus®.
3. Use a soft or microfiber cloth to prevent scratching.
4. If your window is already cloudy, buff it out using a mild buffing compound. We use 3M® Perfect-it™ #1 Rubbing Compound or #2 Machine Polish based on the severity of the window. Note: some windows might be too far to bring back to the original visual clarity.
