NO SNOW TOO DEEP...NO ROAD TOO STEEP

Volume 15 Issue 10 · October 2023

Established in 1942 by Emmitt Tucker Sr., Tucker Sno-Cat® is known worldwide for their four-tracked design, excellent performance, and efficiency. The original manufacturer of over-snow transportation, Tucker Sno-Cat® vehicles provide the ultimate traction advantage in steep terrain, while leaving a gentle footprint.

NO SNOW TOO DEEP...NO ROAD TOO STEEP

Volume 15 Issue 10 · October 2023

Focus on Features: TRACK AND WHEEL CONFIGURATION

Track and wheel configurations are components that can be specified when building a new unit, depending on the application, work load, and machine's terrain requirements. We can specifically design our product for our customers unique needs. Whether it be snow grooming, people transportation, mountaintop access, or agricultural needs, we have track and carrier systems to support our customers' requirements.

Service Department Notes: **FALL CHECKLIST**

As the new season approaches, here are a few items we recommend double checking:

- Fluid filters that are several years old need to be changed at least annually.
- Change old coolant every other year with 60/40 ratio mix, 60% anti-freeze.
- Regarding Model 2000XL, replace the Lexan side windows if scratched enough to cause a visibility issue.
- Check all grease point locations.
- Inspect hydraulic hoses for damage.
- Inspect transport trailer tie down rigging, especially the nylon straps that may have been left in the sun and/or have cuts.
- As the days get shorter, squirrels start collecting goods for their nest. Make sure they are not using your Sno-Cat® vehicle as their new storage facility.

FACES AROUND THE FACTORY

Our company's success is a direct result of our employee's hard work and care of the product they build. An organization is only as good as its employees and we are fortunate to have a great team.
