NO SNOW TOO DEEP...NO ROAD TOO STEEP

Volume 16 Issue 11 · November 2024

Established in 1942 by Emmitt Tucker Sr., Tucker Sno-Cat® is known worldwide for their four-tracked design, excellent performance, and efficiency. The original manufacturer of over-snow transportation, Tucker Sno-Cat® vehicles provide the ultimate traction advantage in steep terrain, while leaving a gentle footprint.

FOUR-ON-THE-SNOW NEWSLETTER

NO SNOW TOO DEEP...NO ROAD TOO STEEP

Volume 16 Issue 11 · November 2024

Focus on Features: STEREO SYSTEM

Installing a quality stereo in your Tucker Sno-Cat® vehicle can help with long work days and grooming nights. Our stereo system comes standard equipment in the Tucker Sno-Cat® Model 2000. An overhead console compliments a touch screen system with blue tooth capabilities.

Service Department Notes: ICE SCRAPERS

When it comes to navigating snowy terrains, the Tucker Sno-Cat® stands out as a versatile and powerful vehicle. Thus, maintaining its performance is essential, particularly in preventing snow build-up on the carrier. One crucial tool in achieving this is the ice scraper, which plays a vital role in ensuring the Sno-Cat® vehicle operates efficiently and safely.

Ice scrapers are attachments designed to remove accumulated snow and ice from the Sno-Cat® tracks. They are positioned strategically on the inside of the tracks to efficiently prevent any build-up as the Sno-Cat® moves.

The more efficient the Sno-Cat® is at moving through snow, the more effective the overall operation will be. Ice scrapers facilitate quicker movements by minimizing snow-related slowdowns.

If you need replacement ice scrapers on your Tucker Sno-Cat® vehicle, it's best to contact us directly. We can provide you with the correct parts, specifications, and any additional information you may need for installation. This ensures that your vehicle remains in top condition and operates efficiently in snowy conditions. Always refer to the manufacturer's guidance for optimal performance and safety.
